

Profile

- **18 Years** of experience in Full stack application **Development, Migration, and Enhancement & Support of Solutions**, Team Management, Analysis, design, Implementation in full life cycle operation. Agile development methodology, Rational Unified Process, Spiral, Relax Waterfall.
- Dedicated Leadership and Team Management abilities enable planning, delegation, monitoring, motivation, growth enabling, conflict resolution, training the team to excellence.
- **1.5 Years** of professional experience in **Computer Hardware Maintenance and Networking**.
- Member of **Senior IEEE, Computer Society IEEE**, Professional **BCS, IETE** Fellow, **IOASD** Royal Fellow, **SASS** Eminent Fellow, **AAITP**, Published a few **Technical Papers, Judge and Mentor for Hackathon and Awards**

Skills & Competencie

- Creative problem solver comfortable with working in rapidly evolving landscape and uncertainty
- Technologically strong and business savvy
- Ability to collaborate effectively across diverse groups from senior stakeholders and clients to junior team members, including senior stakeholder management, project/program management, strategic thinking, tactical & operational solution provision, senior internal/external client interaction
- Demonstrate excellent technical knowledge and equally enthusiastic about business acumen.
- Promote teamwork and maintain effective communication within and across groups.
- Promote and drive continuous process improvement especially in code quality, testability & reliability.
- Highly independent and Result oriented.
- Dedicated to understanding and solving our business challenges.
- Strong analytical skills and Technical skills to be able to set direction on our systems portfolio in close cooperation with lead developers.

Technical Knowledge

Languages	: JAVA/J2EE , R, C and Groovy, Python, Oracle commerce , OCC, BCC etc.
IDE Tools	: Intellij, Eclipse, Visual Studio Code , IBM RAD, NetBeans, R Studio.
UI	: ReactJs, NodeJs, JQuery, Java Script, HTML, CSS, Bootstrap
Frameworks	: Spring, Spring Boot, Security, AOP, WebFlux , Struts, Hibernate , Hyperledger, Wiremock
Application/Web Servers	: JBoss, Oracle Web Logic, IBM Web sphere, Apache Tomee and Geronimo .
Configuration Manager	: JIRA, GIT and RTC.
Tools	: OneOps , CIM, Hudson, NSIS, Ant script, Maven and Gradle, SOAP UI, Postman
Databases	: Cassandra, MySQL, Oracle, Cosmos , MS SQL, MS Access, DB2
Open source	: Apache Camel, Spark and Kafka , Open AM (SSO), OpenTaps ERP/CRM.
Performance Tuning	: IBM Heap analyzer, Dynatrace, Wily, JProfiler, Visual VM, JMeter
CICD	: Jenkins, Kubernetes, Docker, WCNP, Concord, loopier
Other	: Splunk, Lenses, Elastic Search, Kibana, Grafana, Prometheus
AI/ML	: LLM (Chat GPT, Llama, Gemini), CrewAi, AI Agents, LangChain, Pinecone, RAG, Gen AI

Professional Summary

- ❖ **Walmart Global Tech.** (<https://tech.walmart.com>)
Staff Software Engineer
Sunnyvale, CA
04/10/2025 – Till Date
- ❖ **Litmus7 Systems Consulting (P) Ltd.** (<https://www.litmus7.com>)
Principal Architect/Senior Technical Consultant
Client : Walmart Global Tech
Sunnyvale, CA / Bangalore India
March 2016 – April 2023
- ❖ **Infleca Innovation Pvt Ltd.** (<https://infleca.com>)
Co-Founder
Cochin, India
March 2019 – Till Date
- ❖ **IBM India Pvt Ltd** (<https://www.ibm.com>)
Solution Architect/Advisory Consultant (Onsite/Sweden).
Client : IKEA Sweden
Helsingborg, Sweden
June 2013 – March 2016
- ❖ **Sapient Corporation** (<https://www.sapient.com/>)
Senior Associate Technology.
Bangalore, India
April 2011 – June 2013
- ❖ **UST Global Pvt Ltd** (<https://www.ust-global.com/>)
Senior Software Engineer (Java Centre of Excellence).
Technopark, Trivandrum, India
April 2008 – April 2011(Including two months Training)
- ❖ **Accel Transmatic Pvt Ltd** (<https://www.ushustech.com/>).
Trainee Software Engineer
Trivandrum, India
Aug' 07 – April'08
- ❖ **H.C.L Info systems Pvt Ltd** (<https://www.hclinfosystems.in/>).
Technical Support Engineer
Cochin, India
Nov'03 – Oct'04

Education

- **Stanford University** - Professional Certificate in **Computer Science**
- **University of Alberta** - Professional Certificate in **Software Design and Architecture Specialization**
- **Bachelor of Technology Information Technology** from Cochin University of Science & Technology, Cochin with **74.25 %**
- Three years **Engineering Diploma** in **Computer Hardware and Maintenance** from IHRD Model Polytechnic, Painavu with **84.32%**.
- **S.S.L.C** from S.N.V.H.S.S.N R city with **68%**.

Certifications

- **Generative AI Architecture and Application Development** by Edureka
- **Generative AI** by Google
- **Python for Data Science, AI & Development** by IBM
- **Back End Developer** Certification by **Walmart Global Tech**
- **Front End Developer** Certification by **Walmart Global Tech**
- IBM Certified Spark Developer
- IBM Certified Block chain Essentials Developer
- Oracle ATG Web Commerce Suite 10 Implementation Developer.
- ATG Certified Commerce Developer.
- ATG Certified Fundamentals Developer 2010.
- Sun certified Java Programmer (SCJP).
- ANKIT FADIA™ Certified Ethical Hacker 5.0 (AFCEH).

Honors & Awards

- Lifetime Achievement Award (IOASD) · Jan 2025
- Outstanding Achievement Award Indus International University · Jan 2025
- Won Gold Award in the 2024 Claro Awards for the Technology category
- Won 2024 Global Recognition Award
- Walmart Commerce Platform (WCP) Champion 2024
- Walmart Codeception 2019 Runner up
- Litmus7 DRAcathon 2018 Runner up
- Litmus7 Award 2016 for Outstanding Contribution

Projects

♦ **Walmart Commerce Platform (WCP)**

Led and contributed to large-scale migration and modernization initiatives within the Walmart Commerce Platform (WCP), focusing on high-traffic Checkout and Payments microservices. Drove critical contract migrations and integrations across Checkout, OMS, Tender Executor, Tender Planner, Fraud Gateway, RPS, and Promotion Engine, ensuring backward compatibility and zero disruption during rollout. Owned end-to-end production deployments, validation, and ramp-up support, proactively resolving issues during phased rollouts. Played a key role in embedded payments design, cashback implementation, cross-team architecture reviews, and automation test enablement, significantly improving platform stability, scalability, and release confidence across multiple Walmart banners.

♦ **Cart and Checkout migration Walmart International.**

Designed and developed a new Cart and Checkout microservices platform based on Domain-Driven Design (DDD) to replace legacy **Oracle Commerce** for Walmart International. Contributed to large-scale migration on the Walmart Commerce Platform by defining service boundaries, aligning API contracts, and enabling seamless integrations across downstream systems. Supported production deployments, phased rollouts, and post-go-live stabilization, delivering a scalable, resilient, and high-performance checkout experience across international markets.

♦ **CACR ASDA**

Designed and developed a new Customer Care microservices application to replace the legacy **Oracle Commerce Service Center** for Walmart. Applied modern microservices principles to define scalable service boundaries, improve agent workflows, and integrate seamlessly with core commerce systems. Supported

end-to-end delivery, including design, development, and production rollout, enabling a more resilient, maintainable, and extensible customer care platform.

◆ **Ecommerce application to Micro services (ASDA)**

Integrating new functionalities to existing ASDA commerce services and creating new micro service applications (Single profile, Pricing, Inventory etc.) to replace Oracle Commerce modules used in asda.

◆ **PIM Migration**

This is a migration project to replace an existing Fatwire system with Oracle commerce Business control centre.

Roles & Responsibilities

- Establish a strategy to deliver a comprehensive development delivery system.
- Deliver Quality code using best practices, tools and testing.
- Monitor the team's overall progress, as well as proactively responding to any risks or issues, which may arise.
- Become a focal point of contact for all stakeholders throughout the lifecycle and work with internal and external partners to design, validate and deliver solutions with a commercial benefit for our client.
- Manage multiple concurrent initiatives and projects of varying sizes & complexity, of cross-functional teams.
- Create new & maintain existing partner and vendor relationships.
- Upward and downward communication to key stakeholders.
- Manage project budgets, resource plans and deliver to plan.

◆ **Delivery Interface**

This project is to automate club pick up delivery with third party vendors. ATG will drop club pick up orders to Delivery Interface for fulfilment, delivery interface will send the order details to a vendor based on the rules configured in the system and expect delivery status from third party vendors for final hard charge.

Roles & Responsibilities

- Plan project reviews at appropriate frequency; closely monitor projects with Amber, Red and enable a quick turnaround.
- Manage escalations on delivery issues with customers & other stakeholders.
- Customer Knowledge Management to ensure continuity in process knowledge.
- Engaging with employees across all levels in the team.
- Build a harmonious and energised work culture.
- Settle employee issues, interpersonal conflicts in a fair manner.
- Plan team development and capability building interventions to Ensure team is able to deliver value to the client.
- Understand how the delivered projects can help the customer produce results
- Build strong relationships with all key stakeholders in the customer's IT organisation

◆ **Litmus7 Ecommerce Accelerator Platform in ATG 11.2 and WebLogic.**

LEAP (Litmus7 Ecommerce Accelerator Platform) is a vertically integrated and pre-configured Omni channel ecommerce platform from Litmus7 that enables retailers to quickly start their ecommerce journey by leveraging the strength of the ATG platform.

Roles & Responsibilities

- Overseeing and maintaining the workforce projections along with tracking & reporting scope changes and project schedules.

- Planning, coordinating, scheduling and conducting the coordination meetings, documenting issues and actions pertaining to construction schedule.
- Lead all design/development aspects of SDLC
- Develop project documentation -e.g., project plan, and resource plan.
- Ensure resources assigned to projects are meeting deadlines and focused on the right activities.
- Escalate issues, risks, and decisions to EM or other stakeholders as necessary and develop mitigating actions.
- Monitor progress and status of deliverables.
- Ensure proper functioning of the Products / Applications.
- Review projects for completeness of thought and consistency of approach and interface.
- Ensure standards, procedures, and methodologies in the delivery life cycle are followed.

◆ **Retail Commerce Application (Ikea Sweden).**

This is an ecommerce application for a retail giant based out of Sweden.

Roles & Responsibilities

- Lead operations management for offshore/onsite team to develop, maintain software applications as per global business functional requirements.
- Manage performance assessments, capability development, recruitment, and training.
- Liaison with global business stakeholders for annual operations and projects planning, making proposals, resource & infrastructure planning.
- Designing architectural solutions for payment module and checkout module.
- Design and lead the implementation of Pay by credit card functionality by integrating ATG with the ReD payment system.
- Design and leading the Implementation of Pay by Gift Card and Integration with IPay system.
- Design and leading the Implementation of ReD payment fraud tieback functionality.
- Integrating the application with internal legacy systems for fulfilment.

◆ **AdminGUI application in ATG 10.2 and Weblogic.**

AdminGUI is ATG based non ecom application which used to control the data load from Legacy system to Ecom BCC for different Locales.

◆ **Oracle Commerce POC Application in ATG 10.2 and Weblogic.**

This POC/Reusable project involves developing a high class online shopping website for a retail and Telco store using ATG Commerce Suite. The intention behind this project is to develop reusable ATG components that we can directly integrate into any future projects.

Key features that I have involved in this project are

- End to end E-com functionalists using ATG OOTB feature.
- Integration with Oracle Siebel, OBIEE, CSC, BCC, Paypal, Google Map and social Plug-ins
- Integration with Sterling Order management

◆ **Digital Platform an Ecomm Application**

Our client is one of America's leading retailers, operates over 1,107 department stores throughout the United States and Puerto Rico, as well as one of the largest apparel and home furnishing sites on the Internet. Completed the most complex and biggest ATG implementation in the world (based on feedback from our partners at ATG). Some of the capabilities we implemented on the platform have never been done before.

Key features that I have involved in this project are

- Integration with CDI using web service and Tibco queue.
- Manage and view favourite lists and shopping carts.
- User account management and integration with CDI and INET.
- Order history and integration with OTDB.
- Email configuration with cheetah mail. Email preference and integration with CDI.
- Core metrics implementation and SEO and SEO based site map generation.
- Content administration and customization of BCC.
- Production BCC deployment and support activities.

◆ **JCPODC Schedule Manager in Struts2, hibernate, MySql and Tomcat**

This is an internal application which helps PM to schedule shifts for support engineers in JCPenney accounts. This application keeps track of shifts, comp-offs, vacations of support engineers. Anyone can view the last 5 scheduled shifts from the public view.

◆ **Ecomm POC Application in ATG 9.1 and JBoss.**

This POC/Reusable project involves in developing a high class online shopping website for a retail store using ATG Commerce Suite. The intension behind this project is to develop reusable ATG components that we can directly integrate into any future projects.

Key features that I have involved in this project are

- Custom catalog and catalog management, Catalog Searching and Shopping cart Maintenance.
- Up selling and Cross Selling, Product comparison.
- Scenario and Promotions using slots and targetter.
- Pricing and Integrating Gift certificate, Coupons and Store Credit.
- Real Time inventory check by using java web service.
- PayPal module integration for credit card and PayPal account validation.
- Google checkout, Google maps integration for Store search.
- Integrating Gift list and Wish list. Social commerce
- Live Shopping maps, Shop together with Chat option using DWR.
- Custom forgot password functionalities.
- Captcha and Voice Captcha.
- Integration with Solr Search engine.
- Secure repository, Repository Loader to load data into ATG repository.

◆ **Technology transition (Web Sphere to Web Logic).**

This is a project for migrating Web Sphere and DB2 application to Web Logic application server and oracle database. Main activity involved in the project is to configure and replace IBM specific component from the application and configure it for web logic server.

◆ **Technology transition (legacy modernization) with Opentaps ERP.**

This is a POC project done out front of a fullfledged technology transition (legacy modernization) project as part of standardizing the existing system. This system, which is an ERP system in fact, used legacy as well as open systems of Mainframe and interfaced several other external systems. Main activities were aligned with migrating a functional slice from RMS – Purchase Module: PO Receipt – developed in RPG code (running in an AS400 / I-Series box) to Java-JEE (in Linux box).

◆ **Advertisement Market Place.**

Advertisement Market Place (CAMP) is envisaged as a value-added service for the customers of Cisco's Digital Media Players (DMPs) and Signage devices. Network Operators (NOs) divide the available display time into time slots known as 'avails'. Media Buyers (MBs) create advertisement campaigns for specific products and make \$ offers on the avails published by the NOs.

As a Team member I am involved in the following activities

- Created REST services to retrieve and store user information in Open AM.
- Integrated REST services in Liferay portlet application.

◆ **Reference UST web application Framework.**

"UST Web application Framework" that provides a generic web application framework for UST. This application will work as a reference application for Java development teams working on web applications. Additionally, all projects that are built on platforms, or are part of an overall application suite, should create "specific" reference architectures.

◆ **Import Express Online (IEO) in J2EE, EJB, and Jasper Report and Web logic.**

This short term project involves the enhancement of an Import Express Online (IEO) tool for Courier and mail service client.

◆ **Admin tool application in Struts 2, JQuery, Ajax and web sphere.**

This short-term project involves the development of an admin tool for a car rental application using struts 2, JQuery, Ajax and Web Sphere.

Key features that I have implemented in the project are

- Adding, Policy, Search for a Policy

◆ **Personal Savings application in Struts 2, YUI and web sphere.**

This short-term project involves the development of Personal savings pages for a retail application, which displays the offers available for that particular user.

Key features that I have implemented in the project are

- Fetching the savings list from data base.
- Displaying the list using YUI data table.
- Users will be able to add/remove item to cart

◆ **Online Application for mobile phones in ATG 9.0 and JBoss.**

This project involves the development of Dotcom application for mobile phones and it will provide features to the customers like search products and locate the specific stores on the mobile phones and also, they can view the store location on the phone with the help of Google map integration. This application works on the android, iPhone, Windows phones etc...

◆ **Dotcom Application (heb.com)**

The intent of this effort is to make HEB.com an integral part of the customer's shopping experience. The website will give the customer personalized and in-depth information about the Client's brand and stores, while encouraging them to purchase items by providing helpful shopping trip features. In addition, the client will design and implement the internal processes, technologies, and organizational changes required to fully expand the eMarketing channel. This project implemented by using ATG out Of Box components.

◆ **ELMI (Ethernet Local Management Interface).**

Ethernet Local Management Interface (LMI) is an Ethernet layer operation, administration, and management (OAM) protocol.

♦ **IP messenger (Internal Project).**

It's an IP messenger which used to communicate within the organization.
